

Ez Alibaba Clone v5.48

B2C Portal Script

Description:

Business-to-company (B2C) is an Internet business model that involves businesses that perform services or provide products for other businesses. B2B is a form of e-classifieds and it can involve businesses that manufacture a product, service or merchandise component that is sold to another business. B2B may include outsourcing, which occurs when a business hires a contractor with knowledge and experience in that business's industry. The term B2B, however, is better known within the commercial trading realm, where wholesalers sell products to retailers, or a commercial original equipment manufacturer sells its products to wholesalers. For instance, a home manufacturer will make purchases from lumber yards, window manufacturers, concrete businesses, etc.

[wiki] Ez Alibaba Clone is a popular Business-to-business (B2B) software developed in jQuery, PHP and MySQL. This product is considered the best in category. We offer extensive customization (design and development) of this product at minimum charges.

This product can be further customized to launch a website like Blake-envelopes, Bestratererrals, Truelancer, Achilles, B2bpay, Bb-elec, Africa-business, Emarketer etc.
