

iTech Daily Deal Script v6.45

Description:

Deal-of-the-day (also called flash sales or one deal a day) is an eCommerce business model in which a website offers a single product for sale for a period of 24 to 36 hours. Potential customers register as members of the deal-a-day websites and receive online offers and invitations by email or social networks. The deal-of-the-day business model works by allowing retailers to market discounted services or products directly to the customers of the deal company, who receives a portion of the retailer's profit. This allows retailers to build brand loyalty and quickly sell surplus inventory.

[wiki] iTech Daily Deal Script is a popular daily deal software developed in jQuery, PHP and MySQL. This product is considered the best in category. We offer extensive customization (design and development) of this product at minimum charges.

This product can be further customized to launch a website like Kitchenstyle, Tipster, Dealsupto, 225bestests, Sltrib, Keepdoggiesafe, Grabone, Ozstock etc.
