

iTech Job Script v9.40

Description:

A job portal, also known as a career portal, is a modern name for an online job board that helps applicants find jobs. An employment website is a web site that deals specifically with employment or careers. Many big and small organizations are using Internet as a source of recruitment. They advertise job vacancies through worldwide web. The job seekers send their applications or curriculum vitae (CV) through an e-mail using the Internet. A job portal is a modern name for an online job board that helps applicants find jobs and aids employers in their quest to locate ideal candidates. Career websites, such as Monster, Indeed and SimplyHired, have job portals that offer a broad range of jobs in a vast number of fields. It is a web site where employers can post job offers, and people looking for employment can post their skills.

[wiki] iTech Job Script is a popular job portal and application management software developed in jQuery, PHP and MySQL. This product is considered the best in category. We offer extensive customization (design and development) of this product at minimum charges.

This product can be further customized to launch a website like Y-axis, Simplyhired, Jobindex, Themuse, Acuren, 4icj, Theguardian, Webgirls etc.
