

iTech School Management v3.15

Description:

[wiki] iTech School Management is a popular educational management system. A school is also an organization which has a lot of resources spreads across in all directions namely students, teachers, administrative staff and school premises. For an effective & proper management of the school all of these resources are highly important. For proper management of any institute, it is very important to have a well advanced plan of how to utilise the resources. This school management system provides that platform to a school with facilities its management, making it more effective. The cultural data storage makes the data easily accessible to all the departments, eliminating the redundant administrative tasks of data generation. The software will enable its clients to track details of the past and also the current details of the students.

This product can be further customized to launch a website like etc.
